

# AGAVE FLAVOR WHEEL

The flavors of agave spirits are as diverse and wide ranging as the plants, landscapes, production techniques and cultures that produce them. This wheel is meant to help you place the flavors and scents in your glass, or when trying to find the common thread between several destilados produced from the same species of agave or in the same town.

Everyone's palate is different and there are no wrong answers except for "smooth." "Smooth" is great description for the music of Luis Miguel, but it's not a tasting note.
